[The Hole Gallery](#) continues to push the edge as their latest collaborative project between [E.V. Day](#) and [Kembra Pfahler](#) opened up this past Friday to a packed house. The title *GIVERNY* references impressionist legend [Claude Monet's](#) estate located in [Giverny](#), where E.V. Day stayed during her [Munn Artist Residency](#). Inspired by the lily padded ponds located on the estate, E.V. invited Pfahler to the actual garden to shoot the photos in this exhibition. And, through [Playboy's](#) sponsorship, the gallery was transformed into a living breathing garden with wall to wall lilies, willows, and bamboo.
